DCI/IC-3508-76
18 February 1976

MEMORANDUM FOR: D/DCI/IC
SUBJECT   :   Invitation to DCI to Attend WWMCCS
                     Council Meeting.

    1.   Dr. John P. Stenbit, Principal Deputy Secretary
of DTACCS (Defense Telecommunications and Command and
Control Systems) has just phoned me to advise as follows.

       a.   At a meeting yesterday of the WWMCCS Council
    (Worldwide Military Command and Control System),
    Mr. Clements instructed him to invite Mr. Bush to
    a WWMCCS Council meeting to be held in May, at
    which will be discussed the interface between
    intelligence dissemination systems and the proposed
    future architecture of WWMCCS.

       b.   Dr. Stenbit also advises that Mr. Bush will
    be seeing Mr. Ellsworth tomorrow (19 February),
    and the latter will mention this invitation.

       c.   Thereafter, Dr. Stenbit plans to telephone
    the office of the DCI for an appointment in order
    to brief Mr. Bush on WWMCCS.

    2.   As background, you may wish to let Mr. Bush know
that the WWMCCS Council contracted about 18 months ago
with IBM to make a detailed investigation of the charac-
teristics which the WWMCCS system should have in the 1985
time frame. IBM has worked on this with a staff of about
100 people, and they are nearing the conclusion of their
work. At the outset, the DCI was invited to name a con-
tinuing point of contact and, upon recommendation by
D/DCI/IC, I was selected. At the inception of the work
Mr. Colby was briefed by Vincent Cook, the head of the IBM
team. Present also were General Graham, then D/DCI/IC,
and myself, along with DTACCS representatives.

    3.   I tried to steer Dr. Stenbit toward making contact
with the DCI via D/DCI/IC, but Stenbit felt that he had
instructions from Mr. Clements to proceed directly.
